YELLOWSTONE NATIONAL PARK

Land of Wonder; Preserve for All.

On March 1, 1872, Yellowstone became the first national park for all to enjoy the unique hydrothermal and geologic wonders. It is located in the northwest corner of Wyoming, and includes small areas of Montana and Idaho as well. Yellowstone is a treasure that inspires awe in travelers from around the world, boasting more geysers than anywhere else on the globe.

EXPLORING THE YELLOWSTONE

Grand Prismatic Spring was our #1 must do item and it didn't disappoint! Prismatic means brilliantly colored. The intense blue color in the center of this hot spring is due to sunlight being scattered by fine particles suspended in the water. The yellow, orange and brown colors encircling the hot spring are caused by thermophiles - heat loving microorganisms.

We also loved the different geysers. Predictable yet not predictable...Old Faithful Geyser, White Dome Geyser, Great Fountain Geyser, Palette Spring Geyser are some of our favorites!

OUR FAVORITE THINGS TO SEE AND DO

Grand Prismatic Spring

Prism of Light, Spectrum of Light

Old Faithful Geyser

Make sure you check for timing, they are very accurate!

Upper Geyser Basin & Morning Glory Pool

Lamar Valley

This place is HUGE! It's the place to be if you want to see abundant wildlife! We did an 8 hour drive with Yellowstone Western Tour and it was so worth it!

Grand Canyon of the Yellowstone

Hayden Valley

Most popular place to see wildlife

Mammoth Hot Springs

Canary springs boardwalk hike

Yellowstone Grand Loop Road

WHERE TO STAY

Under Canvas Yellowstone

HOW MANY DAYS WILL YOU NEED

I recommend a minimum of 3 days to explore Yellowstone National Park.
